

How do I upgrade from PeakHour 2?

If you purchased PeakHour 2 ("PeakHour") from the Mac Appstore previously, you're entitled to upgrade to PeakHour 3 at a discounted price.

To purchase a discounted upgrade, do the following:

1. Visit peakhourapp.com, click on **Buy or Upgrade** and then **Upgrade**. This will start a download of the free, trial version.
2. Once the download is complete, open the file.
3. Accept the license agreement.
4. Drag PeakHour 3 into the Applications folder.
5. Launch PeakHour 3 from the Applications folder.
6. If existing Mac AppStore version of PeakHour is detected, you'll be presented with the upgrade offer:

Note: If you don't see this window, try deleting the old PeakHour from your Applications folder then reinstall it from the Mac AppStore via the **Purchases** tab.

7. Click the **Upgrade** button and follow the prompts to purchase at the upgrade price.

Note: This is the only way to upgrade PeakHour at the upgrade price. If you upgrade within the app but outside the upgrade offer window, you won't get the discount applied.
