

# How do I reset my configuration?

The process is slightly different depending on whether you're using the [Paddle](#) or [Mac Appstore](#) version of PeakHour.

This will completely remove your PeakHour settings, including your license (if you purchased via Paddle) and your history data. If you wish to retain this information, we suggest making a backup of the files before you delete them.

To reset your configuration, follow these steps:

1. Make sure PeakHour is stopped / not running.
2. Open Terminal (the easiest way is to click the Spotlight magnifying glass in the top-right corner of the screen, type 'Terminal' and hit Enter).
3. Copy and paste the following and hit Enter.

```
rm ~/Library/Preferences/com.digitician.peakhour4.plist
rm -r ~/Library/Application\ Support/PeakHour\ 4
rm -r ~/Library/Containers/com.digitician.peakhour4
```

4. Reboot your Mac.
